# So long, cellulite!

It's a girl thing. Young or old, chubby or thin, most women struggle with those darned dimples known as cellulite. Cellulite is a fact of life for almost 85 percent of us and there hasn't been a lot we can do about it. Until now.

VelaShape, which features the revolutionary combination of bi-polar radiofrequency (RF), infrared light energy, plus vacuum and mechanical massage is the only FDA cleared device that effectively and safely contours, shapes and slims the body by reducing cellulite and firming problem areas in as little as four treatments. The precise heating ensures a safe, effective, fast treatment with no downtime. Vacuum and specially designed rollers for the mechanical massage smooth out the skin for safe and efficient heat energy. The result is an increase in metabolism which increases lymphatic drainage and reduces the size of the fat cells and chambers.

The side effects of VelaShape are minimal, typically a little redness of the skin that dissipates minutes after the procedure. Minor bruising may occur as well as increased urination after the water content of skin cells is released by the body. With VelaShape, you can be treated for cellulite on thighs, buttocks, love handles and abdomen.

VelaShape has been featured on television shows such as "Private Practice," "The Doctors," "Racheal Ray," and "Dr Phil." On "Keeping Up With the Kardashians," Khloe recommends the treatment to Kim.
