Moving Forward

Our exclusive rehabilitation program at Coventry Meadows.

Our Moving Forward Rehabilitation program is designed for those striving to restore abilities lost due to stroke, cardiovascular difficulties, orthopedic surgery and other debilitating conditions. Programs vary in frequency and intensity and include physical, occupational and speech/language therapies. Our goal is to return our participants home safely with the skills they need to continue life on their own terms.

Here's what our participants have to say:

- "The therapy team at Coventry Meadows really sped up my recovery!"
- "They push you here, but I didn't mind because I wanted to get better, and I did!"
- "You can't beat the therapy here at Coventry Meadows. They are simply the best with therapy and patient care."

- Actual quotes from Moving Forward Rehabilitation graduates.

Made To Order
With Custom Blends,
you can do it your way!

Everyone has different skincare concerns, so one cleanser or one anti-aging product isn't effective for all types of skin or all types of conditions. That's why there are new lines of skincare products that can be customized with special condition-specific boosters to address your individual needs.

Customized products enable the skincare professional, after a thorough skin consultation and analysis, to use their knowledge to customize their client's products. This also allows them to treat short term concerns, such as temporary post procedure inflammation as well as longer term skincare concerns, such as a loss of firmness or elasticity, skin discolorations or visible signs of aging by boosting your products with potent state of the art ingredients at the time of dispensing, in a matter of seconds. Among the various conditions that can be treated with the customization process are:

- Adult acne
- Fine lines and wrinkles
- Brown spots due to aging
- Dry skin
- Inflammation / ruddiness
- Lack of firmness

As new breakthrough skincare ingredients are identified, clinically tested and published in scholarly journals, chemists rapidly incorporate them into additional boosters. This ensures you are constantly being provided with state of the art skincare with breakthrough ingredients as they become available.

By customizing your skincare products to meet your specific needs, your aesthetician is involved in your treatment before, during and after your office procedure. You'll feel more secure and more reassured that you are receiving the best care. ■
